

# BEANE™ T-120

REGULAR

**MATERIAL:** 100% Polyester

**REFERENCE #:** Beane™ T-120

---

**WEIGHT:** 14 - 16 oz./sq. yd.  
475 - 543 g./sq. m.

**WEAVE:** Knitted

**YARN TYPE:**      **WARP:**      Texturized Filament  
**FILLING:**      Texturized Filament

**MULLEN BURST:** 400 psi  
2758 kp

**AIR PERMEABILITY:** 80-100 cu. ft./sq. ft. / min. (+ / - 5 cfm)

**MAX OPERATING TEMPERATURE:** 290°F  
143°C

**OTHER AVAILIABLE FINISHES:** Static Eliminator

Unlike conventional woven and needled textiles, Beane™ Bags are knit fabrics consisting of a patented “loop pile” surface. The thickness and fiber density of the knit fabric provides a high permeability, reducing pressure drop conditions, with excellent filtration efficiencies. The physical movement of the “loop pile” surface on the cleaning cycle easily removes heavy dust formations while preventing blinding or plugging of the fabric. **Unfortunately the Beane™ T120 does not come in circular knitted media. It is only sold in wide width.**
